Wood Boiler Installation Opportunities

Biomass Boiler Installation Opportunities

Domestic biomass boilers are set for rapid market growth over the coming years. Volatility of fossil fuel prices and efforts to combat global warming are leading a green revolution.

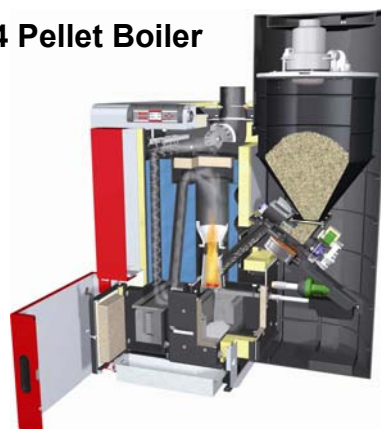

Econergy deliver domestic log, chip and pellet boilers via a national network of regional distributors. We are recruiting experienced plumbers and heating engineers as installers to deliver projects locally or regionally.

Econergy Installation Services

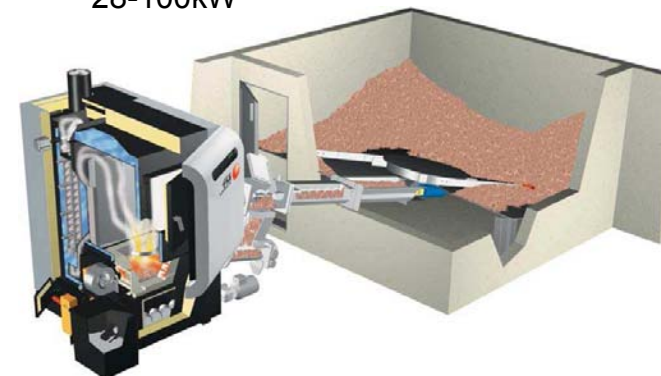

- MCS registered products
- MCS registered installer
- Access to high quality log, pellet and woodchip boilers
- Full UK technical support from one of the UK's leading biomass heating specialists with over 10 years experience in the market
- Comprehensive training; Specify, Sell, Design, Install, Commission and Service
- Courses at British Gas training centre
- Potential grant funding
- Specialist support on more complex systems
